

**River Stour (Kent) Internal Drainage Board**  
**Risk Management Strategy and Policy**

## **Contents**

1. Purpose, Aims & Objectives
2. Accountabilities, Roles & Reporting Lines
3. Skills & Expertise
4. Embedding Risk Management
5. Risks and the Decision Making Process
6. Risk Evaluation and Control
7. Supporting Innovation & Improvement

## **Appendices**

- A – Risk Management Strategy Statement
- B – Risk Management Policy Document
- C – Risk Register

## **1. Purpose, Aims and Objectives**

1.1 The purpose of the Risk Management Strategy is to effectively manage potential opportunities and threats to the Board achieving its objectives. See attached Risk Management Strategy Statement, Appendix A.

1.2 The Risk Management Strategy has the following aims and objectives:

- Integration of Risk Management into the culture of the Board
- Raising awareness of the need for Risk Management by all those connected with the delivery of services (including partners)
- Enabling the Board to anticipate and respond to changing social, environmental and legislative conditions
- Minimisation of injury, damage, loss and inconvenience to staff, members of the public, service users, assets etc. arising from or connected with the delivery of the Board's services
- Introduction of a robust framework and procedures for identification, analysis, assessment and management of risk, and the reporting and recording of events, based on best practice
- Minimisation of the cost of risk

1.3 To achieve these aims and objectives, the following strategy is proposed:

- Establish clear accountabilities, roles and reporting lines for all employees
- Acquire and develop the necessary skills and expertise
- Provide for risk assessment in all decision making processes of the Board
- Develop a resource allocation framework to allocate (target) resources for risk management
- Develop toolkits, procedures and guidelines for use across the Board
- Develop arrangements to measure performance of Risk Management activities against the aims and objectives
- To make all partners and service providers aware of the Board's expectations on risk, both generally as set out in its Risk Management Policy and where necessary in particular areas of the Board's operations

1.4 The Board's Risk Management Strategy is based on the Audit Commission's definition of Risk:

'Risk is the threat that an event or action will adversely affect the organisation's ability to achieve its objectives and to successfully execute its strategies'.

## **2. Accountabilities, Roles and Reporting Lines**

2.1 A framework has been implemented that has addressed the following issues:

- The different types of risk – Strategic and Operational
- Where it should be managed
- Corporate, and Operational roles and accountabilities
- The need to drive the policy throughout the Board
- Prompt reporting of accidents, losses, changes etc.

2.2 In many cases, risk management follows existing service management arrangements.

2.3 Strategic risk is best managed by the Board.

2.4 The Clerk & Engineer and Finance & Rating Officer will be responsible for the implementation of the overall strategy and will report directly to the Board.

2.5 The Clerk & Engineer and Operations Officer will be responsible for the implementation of Health & Safety policy and will report to the Board.

2.6 It is envisaged that the development of a risk management strategy will encourage ownership of risk and will allow for easier monitoring and reporting on remedial actions / controls.

### **3. Skills and Expertise**

3.1 Having established roles and responsibilities for risk management, the Board must ensure that it has the skills and expertise necessary. It will achieve this by providing Risk Management Training for its staff and where appropriate providing awareness courses that address individual needs.

3.2 Training will include seminars focusing on best practice in risk management and awareness courses will also focus on specific risks in areas such as the following:

- Partnership working
- Project management
- Employment Law
- Operation of Board vehicles and equipment
- Manual labour tasks e.g. Health and Safety issues

### **4. Embedding Risk Management**

Risk management is an important part of the service planning process. This will enable both strategic and operational risk, as well as the accumulation of risks from a number of areas to be properly considered. Over time the Board aims to be able to demonstrate that there is a fully embedded process.

This strategy and the information contained within the appendices provide a framework to be used by all levels of staff and Members in the implementation of risk management as an integral part of good management.

### **5. Risks and Decision Making Process**

5.1 Risk needs to be addressed at the point at which decisions are being taken. Where Members and Officers are asked to make decisions they should be advised of the risks associated with recommendations being made. The training described in the preceding section will enable this to happen.

5.2 The Board will need to demonstrate that it took reasonable steps to consider the risks involved in a decision.

5.3 A Risk Register has been developed to identify all significant risks (Appendix C).

5.4 There needs to be a balance struck between efficiency of the decision making process and the need to address risk. Risk assessment is seen to be particularly valuable in options appraisal. All significant decision reports to the Board (including new and amended policies and strategies) should include an assessment of risk to demonstrate that risks (both threats and opportunities) have been addressed.

5.5 This process does not guarantee that decisions will always be right but it will demonstrate that the risks have been considered and the evidence will support this.

## 6. Risk Evaluation and Control

6.1 A risk register should be used to record the Board's objectives and the risks to achieving these. Once these have been identified an assessment of the impact and likelihood of occurrence is made using knowledge of current controls and assurances and a risk score determined. Any gaps in controls and/or assurance should then be identified and an action plan for improvement developed.

6.2 The risk score is obtained using the risk matrix below:

### Risk Assessment Framework used (5 x 5 Matrix)

		IMPACT				
		Negligible (1)	Minor (2)	Moderate (3)	Major (4)	Extreme (5)
LIKELIHOOD	Expected (5)	MEDIUM (5)	MEDIUM (10)	HIGH (15)	VERY HIGH (20)	VERY HIGH (25)
	Probable (4)	LOW (4)	MEDIUM (8)	HIGH (12)	HIGH (16)	VERY HIGH (20)
	Possible (3)	LOW (3)	MEDIUM (6)	MEDIUM (9)	HIGH (12)	HIGH (15)
	Unlikely (2)	MINIMAL (2)	LOW (4)	MEDIUM (6)	MEDIUM (8)	MEDIUM (10)
	Remote (1)	MINIMAL (1)	MINIMAL (2)	LOW (3)	LOW (4)	MEDIUM (5)

The categories for **likelihood** are defined as follows:

Likelihood	Likelihood score	Description
<b>Expected</b>	<b>5</b>	The future event or events is expected to occur in most circumstances during the next year
<b>Probable</b>	<b>4</b>	The future event or events are likely to occur
<b>Possible</b>	<b>3</b>	The chance of the future event or events is more than remote but less than likely
<b>Unlikely</b>	<b>2</b>	The chance of future event or events occurring is slight
<b>Remote</b>	<b>1</b>	The future event or events may occur only in exceptional circumstances

The categories for **impact** are defined as follows:

Impact	Impact score	Financial	Reputational	People	Business Interruption	Health and Safety	Compliance	Client Customer service
Extreme	5	Such significant financial consequences that ability to operate is threatened.	Sustained lead story and adverse national / international coverage; multiple media types	Widespread unexpected loss of key staff; sizeable sustained increase in staff turnover; large number of staff impacted across multiple locations	A disruptive event with the potential to lead to the collapse; dedicated management and Partners time required; recovery time lengthy (e.g. years)	Negligent death of one or more individual	Major regulatory, criminal investigation; potential imprisonment of management or directors;	Large number of customers impacted (> 30%); adverse client customer reaction (e.g. lawsuits); permanent loss of multiple clients / customers
Major	4	Material financial consequences	Adverse national coverage, one or more media types	Unexpected loss of multiple key staff; sustained increase in staff turnover; large number of staff impacted across 1 or 2 locations	A disruptive event that disrupts multiple key projects / processes, stretches plans, and requires considerable management effort to endure; recovery time major (e.g. months)	Accidental death of one or more individual Multiple serious injuries	Public comments / criticism by regulators or governments; investigated	Many clients / customers impacted (10%- 30%); high likelihood of adverse client/ customer reaction (e.g. lawsuits); may lose some clients / customers permanently
Moderate	3	Considerable financial consequences	Adverse regional coverage, one or more media types	Unexpected loss of some key staff; temporary increase in staff turnover; significant number of staff impacted	A disruptive event which disrupts operations and requires some additional management time / focus; recovery time significant (e.g. weeks)	Serious injury to more than one individual or multiple lost time injuries	Notification from regulators or governments (not public); notable breach of statutory / regulatory requirements	Large number of clients / customers impacted (5%-10%); significant negative consequences requiring additional actions to rectify; negative client / customer reaction but temporary
Minor	2	Some financial consequence	Brief (short-lived) adverse local or regional coverage	Minor staff absences requiring no treatment; little or no increase in staff turnover; some staff (small number, single location) may be impacted	Disruptive event requires actions greater than normal activity; recovery time short (e.g. days)	Serious/long term injury to an individual, or minor injury to many	Accidental breach, easily remedied, potential for warning	Small number of clients / customers impacted (1%-5%); may require notification but no other extraordinary activities
Negligible	1	No material financial consequence	No media coverage or interest, business as usual, restricted to internal communication only	Negligible impact on staff	Disruptive event can be absorbed through normal activity and resource levels; no down / recovery time	Incident resulting in lost time injury to a single individual	Compliance failure with no specific penalty attached	Few, if any clients / customers (< 1%) impacted

Using the risk matrix produces a risk rating score that will enable risks to be prioritised using one or more of the “four T’s”. Scores are gained by multiplying likelihood level by impact level:

Risk Level	Risk Score	Associated Monetary Value	Risk Treatment
Minimal	1 – 2	Under £2,500	<b>Tolerate:</b> Accept the risk.
Low	3 – 4	£2,500 to £10,000	<b>Tolerate:</b> Accept the risk.
Medium	5 – 10	£10,000 to £100,000	<b>Treat:</b> Take cost effective in-house actions to reduce the risk.
High	11 – 16	£100,000 to £200,000	<b>Transfer:</b> Through insurance or passing responsibility for the risk to a contractor.
Very High	17 – 25	Over £200,000	<b>Terminate:</b> Agree that the risk is too high & do not proceed with the project/activity.

## 7. Supporting Innovation and Improvement

7.1 Risk Management will be incorporated into the business planning process for the Board with a risk assessment of all business aims being undertaken as part of the annual estimates process and separate risk assessments for Health & Safety and Financial risks.

7.2 The Board’s internal auditor will have a role in reviewing the effectiveness of control measures that have been put in place to ensure that risk management measures are working.

Approved 6<sup>th</sup> February 2025

## **Appendix A**

### **RISK MANAGEMENT STRATEGY STATEMENT**

The Board believes that risk is a feature of all businesses. Some risks will always exist and can never be eliminated: they therefore need to be appropriately managed.

The Board recognises that it has a responsibility to manage hazards and risks and supports a structured and focused approach to managing them by approval of a Risk Management Strategy.

In this way the Board will improve its ability to achieve its strategic objectives and enhance the value of services it provides to the community.

#### **The Boards Risk Management objectives are to:**

- Embed risk management into the culture and operations of the Board
- Adopt a systematic approach to risk management as an integral part of service planning and performance management
- Manage risk in accordance with best practice
- Anticipate and respond to changing social, environmental and legislative requirements
- Ensure all employees have clear responsibility for both the ownership and cost of risk and the tools to effectively reduce / control it

#### **These objectives will be achieved by:**

- Establishing clear roles, responsibilities and reporting lines within the organisation for risk management
- Incorporating risk management in the Board's decision making and operational management processes
- Reinforcing the importance of effective risk management through training
- Incorporating risk management considerations into Service / Business Planning, Project Management, Partnerships & Procurement Processes
- Monitoring risk management arrangements on a regular basis

#### **The benefits of Risk Management include:**

- Safer environment for all
- Improved public relations and reputation for the organisation
- Improved efficiency within the organisation
- Protect employees and others from harm
- Reduction in probability / size of uninsured or uninsurable losses
- Competitive Insurance Premiums (as insurers recognise the Board as being a "low risk")
- Maximise efficient use of available resources.

## **Appendix B**

### **RISK MANAGEMENT POLICY DOCUMENT**

In all types of undertaking, there is the potential for events and consequences that may either be opportunities for benefit or threats to success. Internal Drainage Boards are no different and risk management is increasingly recognised as being central to their strategic management. It is a process whereby Internal Drainage Boards methodically address the risks associated with what they do and the services which they provide. The focus of good risk management is to identify what can go wrong and take steps to avoid this or successfully manage the consequences.

Risk management is not just about financial management; it is about achieving the objectives of the organisation to deliver high quality public services. The failure to manage risks effectively can be expensive in terms of litigation and reputation and hinder the ability to achieve desired targets.

Internal Drainage Boards need to keep under review and, if need be, strengthen their own corporate governance arrangements, thereby improving their stewardship of public funds and providing positive and continuing assurance to ratepayers.

The Board already looks at risk as part of their day to day activities but there is now a need to look at, adapt, improve where necessary and document existing processes.

Members are ultimately responsible for risk management because risks threaten the achievement of policy objectives. As a minimum, the members should:

- take steps to identify and update key risks facing the Board;
- evaluate the potential consequences to the Board if an event identified as a risk takes place; and
- decide upon appropriate measures to avoid, reduce or control the risk or its consequences.

This Risk Management Policy document is designed to be a living document which will be continually updated when new risks are identified or when existing risks change.

The assessment of potential risks will be classified as Minimal, Low, Medium, High or Very High. At the same time it will assess how likely a risk is to occur and this will enable the Board to decide which risks it should pay most attention to when considering what measures to take to manage the risks.

After identifying and evaluating risks the responsible officer will need to decide upon appropriate measures to take in order to avoid, reduce or control the risks or their consequences.

## **Appendix C**

### **RISK REGISTER (separate document)**
